

BUG HUNT

We're going on a bug hunt!

- Go into your garden or when on a walk and take a look for the variety of bugs you can find.
- Look in different places with your child - under logs, on the grass, on trees and bushes, under leaves, on stones...
- Talk about the bugs you find and their features.
- You could photograph the bugs you find.
- Ask your child to draw, write the name and label each bug they find.
- Your child might like to make a bug in junk modelling materials you find at home.
- Your child might like to make a plasticine model, draw, paint or create a collage of a bug.

This can be ongoing over the week as you find bugs in different places. Have fun and happy hunting!
