

Dear Parents/Carers,
This powerpoint takes the children through the learning sequence. If possible please talk through the slides with your child and check their understanding. The slides start at a basic level to re-cap previous learning.

Mass, Capacity and Temperature

14.5.20

14.5.20

LO: I can measure in litres

Mathematical Vocabulary

Capacity is the amount something can hold.

Volume is the amount of something in the container.

Try this out at home -

Get a jug. How many **millilitres (ml)** does the jug hold? This is the **capacity**.

Fill the jug with 250ml of water. This is the **volume**.

We measure liquid in **millilitres (ml)** and **litres (l)**.

There are 1000ml in 1l

Starter

What is the volume in each container?

Look at what unit of measurement is on each container. Write the answers in your book.

Starter - answer

What is the volume in each container?

4 Litres

950ml

750ml

5 Litres

Descriptive Teaching

What is the capacity of the water bottle?

The water has been emptied into 4 containers. What operation do we need to use to find out the total capacity?

Descriptive Teaching - Answer

We had to use addition to work out the total amount.

Descriptive Doing

Colour the containers to show the given volume.

**2L and
950ml**

Draw the containers
in your book and
colour in the
amount of water.

Descriptive Doing - Answer

Colour the containers to show the given volume.

**2L and
950ml**

Reflective Teaching

True or false?

I have 1L and 600ml
of pea soup for the
school dinner hall.

Tell an adult the answer.

Reflective Teaching - Answers

True or false?

I have 1L and 600ml
of pea soup for the
school dinner hall.

False. He has 1L and 500ml.

Reflective Doing

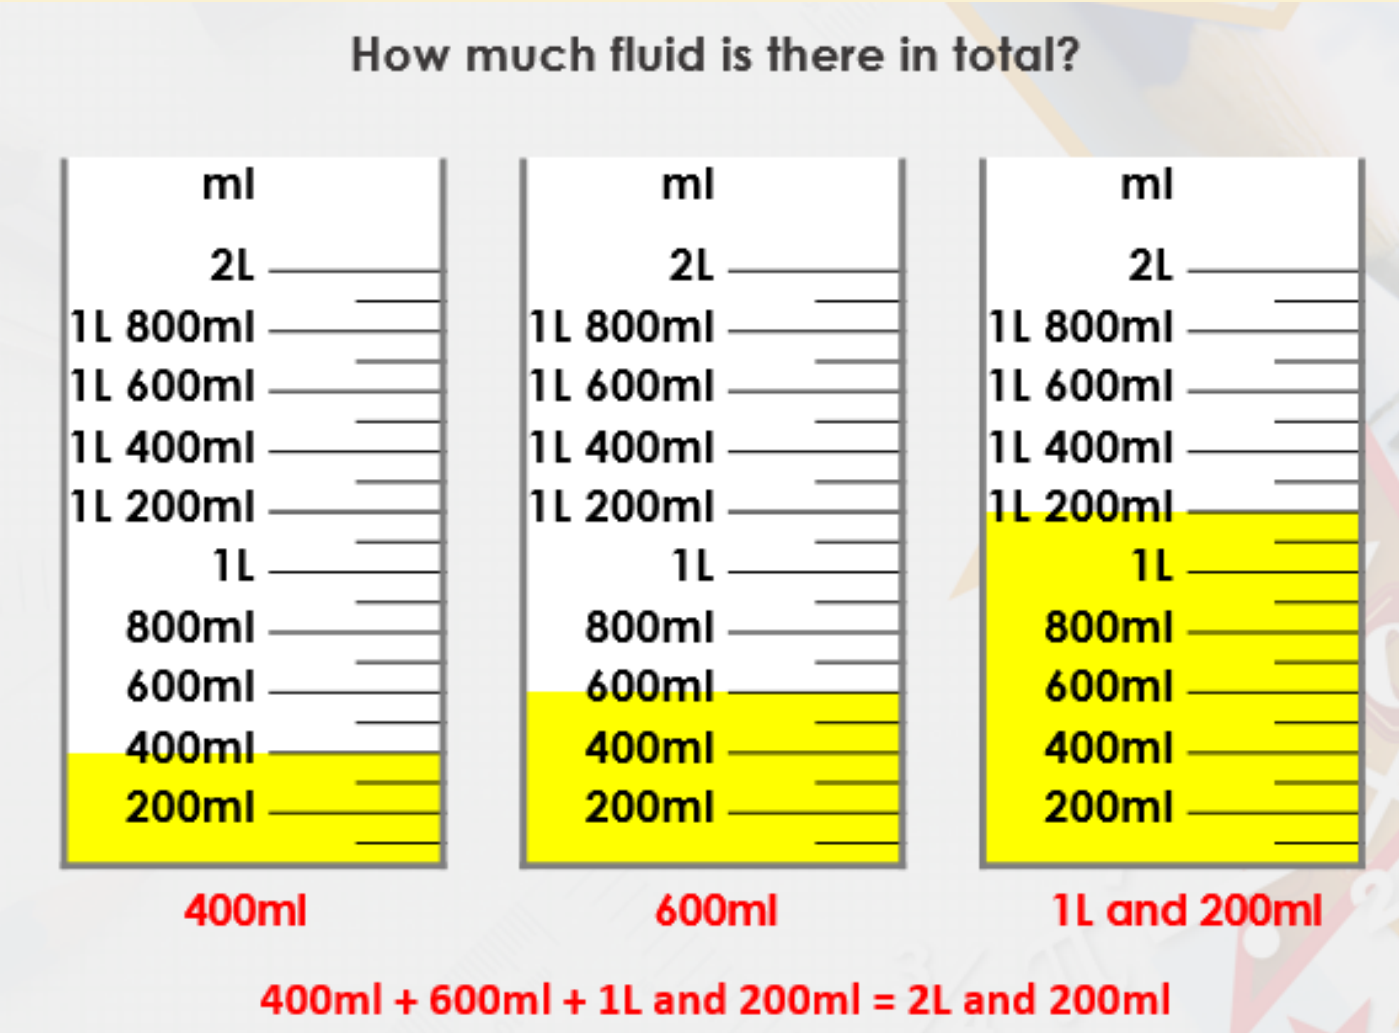

How much fluid is there in total?

What operation do we use to find the total?
Work out the answer in your book.

Reflective Doing - Answers

We use addition to work out the total amount.

Independent work

The following slides are questions for you to work through independently.

There are 3 sets of work - 1 chili (the easiest), 2 chilies, 3 chilies (the hardest). Choose one set you feel most comfortable with.

Independent work

1a. Circle the capacity of the teapot.

3L and
700ml

2L and
700ml

S VF

1b. Circle the capacity of the honey pot.

3L and
800ml

4L and
300ml

S VF

Independent work

2a. Colour the containers to show the given volume.

3L and 500ml

S VF

2b. Colour the containers to show the given volume.

2L and 700ml

S VF

Independent work

3a. True or false?

I have 1L
and 300ml
of
cranberry
juice for
my
family's
breakfast.

S VF

3b. True or false?

I have
800ml of
apple
juice for
my
breakfast.

S VF

Independent work

4a. How much liquid is there in total?

3 VF

4b. How much liquid is there in total?

3 VF

Independent work

5a. Circle the capacity of the teapot.

3L and 350ml

4L and 400ml

3L and 400ml

5b. Circle the capacity of the teapot.

4L and 600ml

4L and 650ml

4L and 700ml

Independent work

6a. Colour the containers to show the given volume.

3L and 650ml

6b. Colour the containers to show the given volume.

2L and 150ml

Independent work

7a. True or false?

I have 1L and 500ml of orange juice for my family's breakfast.

S VF

7b. True or false?

I have 1L and 800ml of syrup to bake some flapjacks.

S VF

Independent work

8a. How much liquid is there in total?

3 VF

8b. How much liquid is there in total?

3 VF

Independent work

9a. Circle the capacity of the cups.

4L and
350ml

4L and
400ml

4L and
300ml

S VF

9b. Circle the capacity of the teapot.

5L and
800ml

5L and
750ml

5L and
875ml

S VF

Independent work

10a. Colour the containers to show the given volume.

6L and
600ml

10b. Colour the containers to show the given volume.

7L and
200ml

Independent work

11a. True or false?

I have 2L and 250ml of kale smoothie for my class's lunch time.

3 VF

11b. True or false?

I have 1L and 750ml of blackcurrant squash for my class's play time.

3 VF

Independent work

12a. How much liquid is there in total?

3 VF

12b. How much liquid is there in total?

3 VF

Answers

Developing

1a. 2L and 700ml

2a. Three with lines at 1,000ml and one with a line at 500ml

3a. False, she has 1L and 400ml

4a. 2L

Expected

5a. 3L and 400ml

6a. Three with lines at 1,000ml and one with a line at 650ml

7a. False, he has 1L and 600ml

8a. 2L

Greater Depth

9a. 4L and 300ml

10a. One with a line at 4L and the other at 2L 600ml.

11a. False, she has 2L and 125ml

12a. 8L and 200ml

Developing

1b. 3L and 800ml

2b. Two with lines at 1,000ml and one with a line at 700ml

3b. True

4b. 1L and 500ml

Expected

5b. 4L and 650ml

6b. Two with lines at 1,000ml and one with a line at 150ml

7b. False, she has 800ml

8b. 3L and 500ml

Greater Depth

9b. 8L and 875ml

10b. One with a line drawn at 4L and the other drawn at 3L 200ml.

11b. False, she has 1L and 875ml

12b. 8L

Reflection Time

Carl fills the measuring cylinder with liquid. The volume is more than 1L and 400ml but less than 1L and 600ml. Which of these containers could he fill exactly?

Take time
to reflect

Reflection Time - Answers

Carl fills the measuring cylinder with liquid. The volume is more than 1L and 400ml but less than 1L and 600ml. Which of these containers could he fill exactly?

1L and
200ml

1L and
650ml

1L and
900ml
