

# DECIMALS – DAY 4

To be able to order numbers  
with up to two decimal places

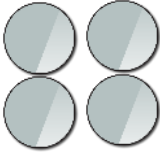

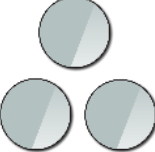

# SUCCESS CRITERIA

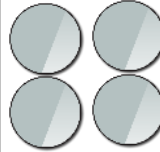

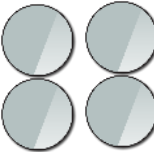

- ✓ I can use mathematical equipment and pictorial representations, such as place value charts, to help me compare numbers with up to two decimal places.
- ✓ I can explain my reasoning when using mathematical equipment and pictorial representations, such as place value charts, to help me compare numbers with up to two decimal places.

# STARTER

If the tables shown are the second and third steps in a sequence, what comes before and what comes afterwards?

1s	0.1s	0.01s

1s	0.1s	0.01s
		
4	0	3

1s	0.1s	0.01s
		
4	0	4

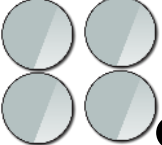

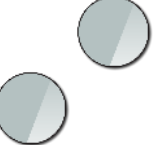

1s	0.1s	0.01s

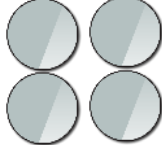

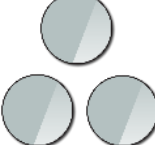

Fill in the tables.

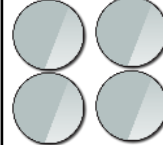

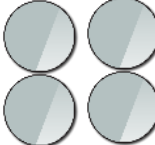

Explain your answer.

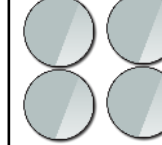

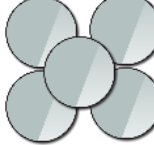

# STARTER

If the tables shown are the second and third steps in a sequence, what comes before and what comes afterwards?

1s	0.1s	0.01s
		
4	0	2

1s	0.1s	0.01s
		
4	0	3

1s	0.1s	0.01s
		
4	0	4

1s	0.1s	0.01s
		
4	0	5

Each step shows the number increasing by 1 hundredth, as the second step shows 4.03 and the third step shows 4.04. So, the sequence is 4.02, 4.03, 4.04, 4.05.

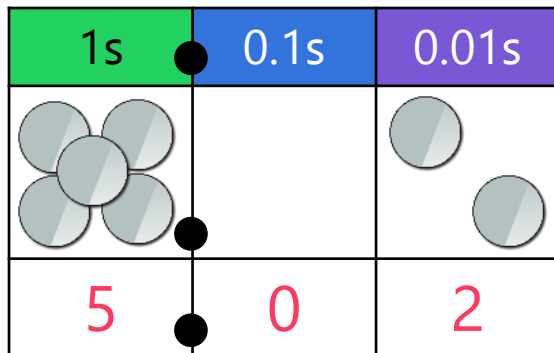

## TALKING TIME

Write down the value of each of the numbers shown in the place value charts, then place the numbers in ascending order in the cards below.

# TALKING TIME

Write down the value of each of the numbers shown in the place value charts, then place the numbers in ascending order in the cards below.

2.1

Ruth	1.21 m

# EVALUATION

I have used comparison symbols to put my numbers in descending order.

$22.02 > 12.2 > 20.02 > 12.02 > 0.2$

Can you spot Astrobee's mistake?  
Explain your response fully.

# EVALUATION

I have used comparison symbols to put my numbers in descending order.

$22.02 > 12.2 > 20.02 > 12.02 > 0.2$

Astrobee has placed 20.02 in the wrong place. The correct order is:

$22.02 > 20.02 > 12.2 > 12.02 > 0.2$ , as 20.02 is greater than 12.2.
