To be able to count using coins

Talking Time:

Use the comparison symbols $<$, $>$ and $=$ to compare the sets of coins below.

To be able to count using coins

Talking Time:

Use the comparison symbols $<$, $>$ and $=$ to compare the sets of coins below.

To be able to count using coins

Activity 6:

Use the comparison symbols $<$, $>$ and $=$ to compare the sets of coins below.

To be able to count using coins

Activity 6:

Use the comparison symbols $<$, $>$ and $=$ to compare the sets of coins below.

To be able to count using coins

Evaluation:

Two silver
coins are
worth more
than five
copper coins.

Is Astrobee's statement always, sometimes or never true?
Explain your answer.

To be able to count using coins

Evaluation:

Two silver
coins are
worth more
than five
copper coins.

Astrobee's statement is only sometimes true. Although most sets of two silver coins are more than most sets of five copper coins, two 5 p coins are worth the same as five 2 p coins!
