

EXPLORING SHELTERS

Answer the following questions for each of the structures.

Roughly how many pieces are there in this structure?

How are the pieces joined together?

How many parts of this structure can you name? (Frame, canopy etc).

What is the purpose of each part?

Who or what is it designed for?

What is it made out of?

What alternative materials could this structure have been made with?

Where and how was this shelter made?

Why has the shelter been made in this way?

How well would the shelter protect you in a windy and rainy storm?

Who will use it?

Which constructions are strongest?
